

EVS ACTIVITY

"Lighter than a feather, heavier than you think!"

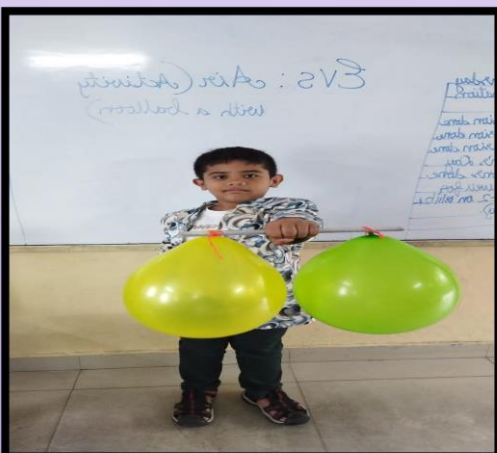

The students of Grade II were engaged in a fun and interactive activity to explore the invisible yet powerful properties of air, fostering curiosity and understanding of the natural world.

The purpose of the activity was to show that air occupies space.

Each student was given a deflated balloon. They were asked to blow air into the balloon and observe how it inflates. This explained that "The air you blew in pushes against the balloon's walls, making it expand. Air takes up space!"

Using balloons as props allowed students to observe air in action, helping them grasp abstract concepts like air pressure, force, and movement through tangible experiences.

This activity enabled students to develop experiential learning, scientific thinking and also to build fine and gross motor skills.

MATHS ACTIVITY

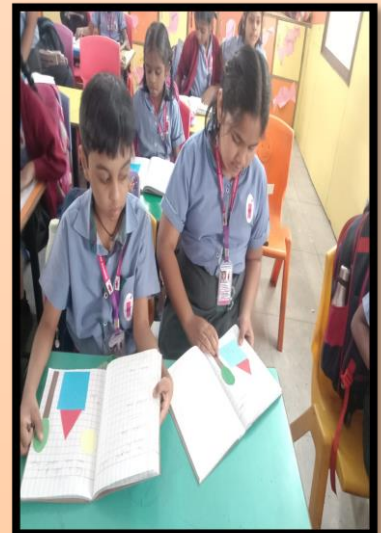

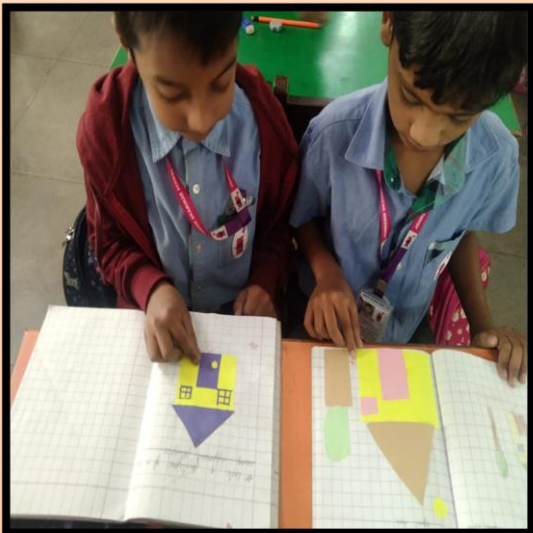

"Shape Your Imagination – Math Made Fun!"

Teachers of Grade II combined creativity and geometry in a hands-on activity where the children created a picture of a house using different shape cutouts. This activity not only encouraged artistic expression but also helped reinforce their understanding of basic shapes. Each student was given an assortment of pre-cut shapes in various colors.

They were instructed to build a house on an A4 size sheet by arranging and gluing the shapes together.

Few students added creative elements like trees, fences, or clouds using extra shapes or crayons.

Once the houses were completed, each child had the opportunity to present their artwork to the class. They shared how they used the shapes and what features they added to their house. This activity was a wonderful blend of art and math. It helped the children recognize and use shapes in a creative way, while also developing their fine motor skills and spatial awareness. The finished houses were bright, unique, and showcased each child's imagination.

CHILDREN'S DAY CELEBRATIONS

Cheers To A Magical And A Fun Filled Day!.

The children's day celebration was a day filled with laughter, wonder, and unforgettable memories for our Grade I and II students.

The festivities began with a spectacular magic show that left everyone in awe. The magician's tricks, from disappearing objects to colorful illusions, sparked wide-eyed amazement and giggles of delight. The children were not just spectators but also active participants, adding an extra touch of fun and excitement.

Following the magic show, the school organized a variety of fun games tailored to suit our little ones' interests and energy levels. From relay races to musical chairs and balloon bursting, the students enjoyed every moment with enthusiasm and teamwork. Their cheers and laughter echoed throughout the day, showcasing the true spirit of Children's Day.

Such events not only bring joy but also foster a sense of togetherness, creativity, and happiness among students.

EVS ACTIVITY

“ Explore the Wonders of Plants with Our Fun Foldable Activity”!

The students of Grade I were engaged in an hands-on learning activity. The little botanists of Grade I dived into the fascinating world of plants with a Parts of a Plant Foldable Activity.

This interactive project was designed to help students:

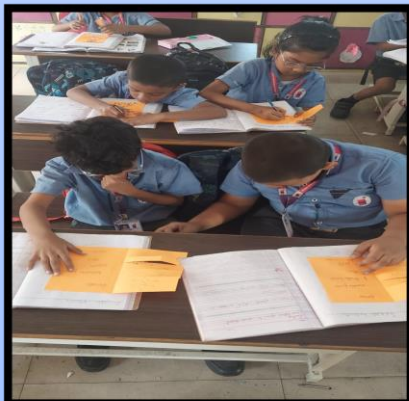

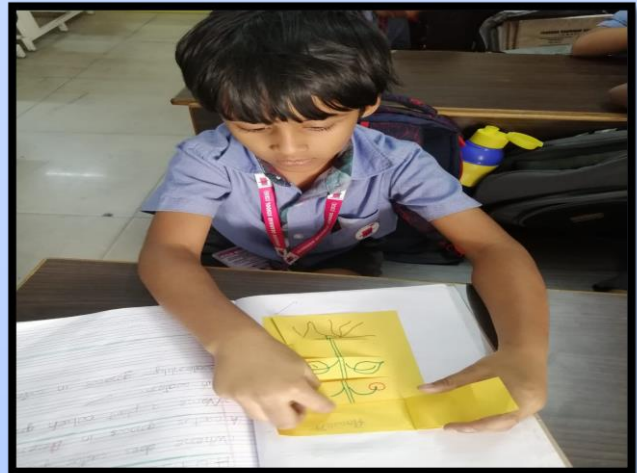

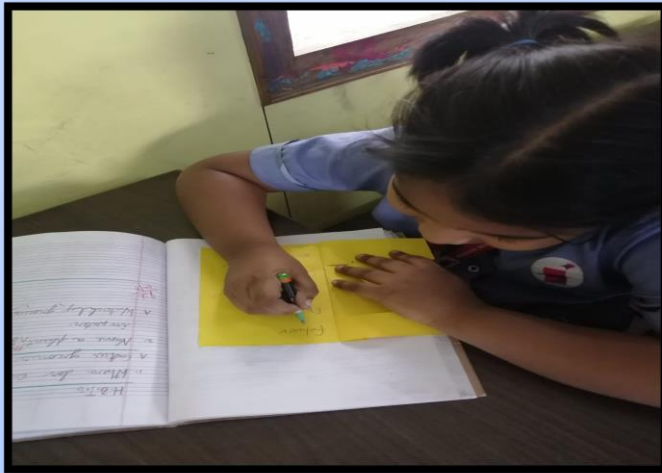

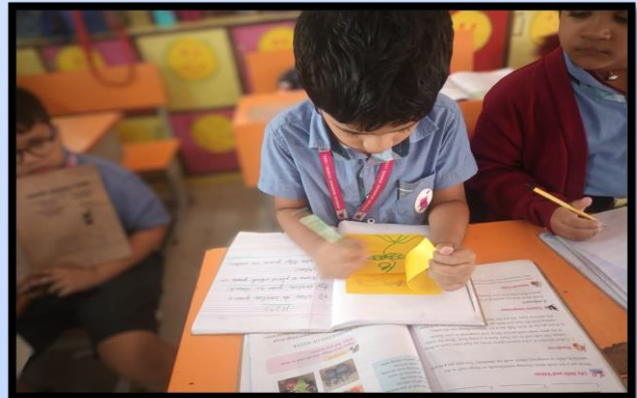

Identify and label the key parts of a plant: roots, stem, leaves, flowers, and fruits.

Understand the important role each part plays in helping plants grow and thrive.

Strengthen fine motor skills through cutting, folding, and assembling their foldable.

Students used colorful papers, labels, and illustrations to create their very own plant foldable, turning learning into a creative and engaging experience. At the end of the activity, they had a vibrant, take-home resource to showcase their knowledge.

The students then shared what they had learned about plants and their parts—it was a great opportunity for students to spark a conversation about nature and science.

ENGLISH ACTIVITY "Read, Think And Act"!

The young learners of Grade I actively participated in a dynamic and interactive session designed to introduce and reinforce the concept of "Verbs". The classroom transformed into a lively arena where students identified action words through games, songs, and role-playing activities.

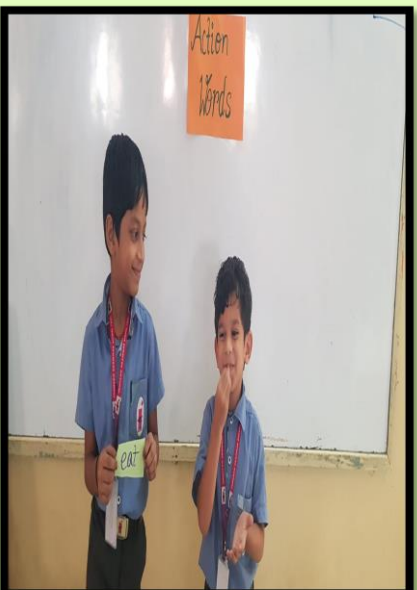

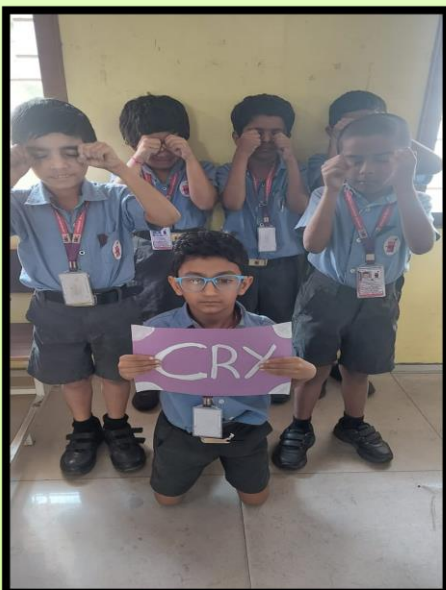

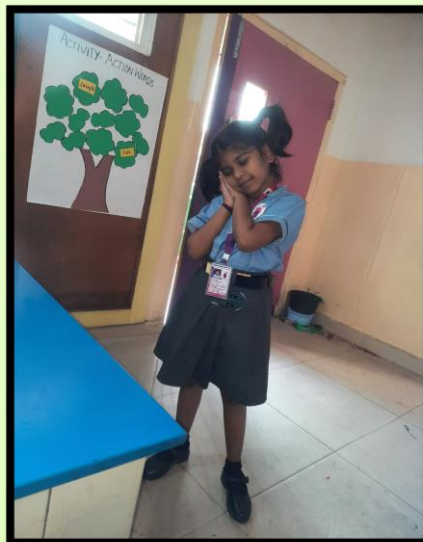

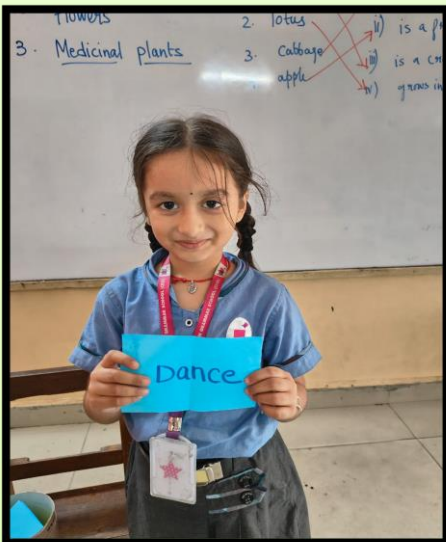

Action Word Charades: Students acted out verbs like "jump," "run," and "clap," while their peers guessed the words.

Interactive Storytelling: Using action words to narrate imaginative stories.

Hands-on Worksheets: Fun exercises to connect pictures with the corresponding action words.

This activity not only helped the students enhance their vocabulary but also fostered teamwork, creativity, and confidence in expressing themselves.

It was an exciting learning journey for our Grade I students as they explored the world of **Action Words** through a fun-filled activity.

LITERARY FEST ACTIVITY

"Igniting Young Minds With The Joy Of Literature!"

Our school recently hosted a delightful Literary Fest for our little readers in Grades I and II, sparking their imagination and love for stories. The event was a celebration of creativity, language, and expression, tailored to inspire our youngest learners.

The fest featured engaging activities such as storytelling sessions, where children were transported to magical worlds, and poetry recitals, where their voices filled the air with rhythm and rhyme. Hands-on puppet-making workshops encouraged them to bring their favorite characters to life. Advertising their favourite products in a creative way was also a part of the fest. An interactive "Book Parade" gave them a chance to dress up as their favorite storybook heroes and narrate their tales.

Each activity was designed to foster a sense of confidence and a love for reading and writing. The event concluded with a special "Reader's Corner," where students showcased their budding literary talents and shared their favorite books.

The enthusiasm and energy of our young participants made the Literary Fest a memorable experience.
