

FOUNDER'S DAY

Honoring Our Roots - A Heartwarming Founders' Day Celebration

A symphony of laughter and excitement echoed through our school's historic corridors as our youngest scholars from Grades I and II gathered to honor our Founders' Day. The celebration paid homage to the visionary leader, Shri S.R.N. Mudiraj sir, whose dream laid the cornerstone of our esteemed institution.

The morning began with a touching floral tribute to Shri S.R.N. Mudiraj sir, as tiny hands carefully placed blooms before his portrait, their eyes wide with wonder at the stories of our school's origins. The children's creative spirits soared as they crafted heartfelt "Thank You" cards adorned with colourful drawings and earnest messages. Through specially designed games, these young minds not only embraced the joy of play but also absorbed the foundational values of teamwork, respect, and innovation that our founder held dear.

This memorable celebration bridged our institution's storied past with its promising future, as evidenced by the gleaming eyes and boundless enthusiasm of our students. Their genuine tributes - from spontaneous songs to carefully crafted artwork - transformed this Founders' Day into a tapestry of innocence, gratitude, and youthful exuberance, perfectly embodying our founder's vision of education filled with joy and purpose.

EXPLORING CREATIVITY AND JOY

Grade I students embarked on a magical journey of self-discovery through the innovative "Who Am I?" activity on 14th December, 2024. This creative workshop transformed the classroom into a toy-based learning phase where young princes and princesses crafted their personalized crowns using colourful craft paper.

The heart of the activity lay in its unique approach to self-expression – each child chose a special adjective that they felt represented their personality, creating combinations like "Awesome Ansh," "Kind Keira," and "Brilliant Brinda." As they carefully wrote these descriptions next to their names on their handmade crowns, the students not only practiced their writing skills but also explored vocabulary and self-awareness in a meaningful way.

The classroom buzzed with creative energy as tiny fingers folded and decorated the craft paper, turning simple materials into regal headpieces. Teachers moved among the busy artists, offering gentle guidance while encouraging independent thinking. The most heartwarming moments came when children proudly explained their chosen adjectives to classmates, fostering both self-confidence and peer appreciation. This activity beautifully demonstrated how learning can be seamlessly woven into play, creating memories that will last far beyond the classroom walls.

TICK TOK IT'S TIME TO ROCK

Second graders embarked on an interactive journey into the world of timekeeping through an immersive clock-making project. Using paper plates as their foundation, students transformed simple materials into functional learning tools that brought the abstract concept of time to life.

Each student made a miniature clockmaker, As they worked, they grasped fundamental concepts like the significance of the number placement, the clockwise direction of movement, and the relationship between the short and long hands. This hands-on approach to learning not only strengthened their understanding of time concepts but also fostered problem-solving skills and spatial awareness. The pride in their completed clocks was evident as they enthusiastically demonstrated their new time-telling abilities to classmates, creating a collaborative learning environment that made mastering this fundamental life skill both meaningful and memorable.

THE NATURE - PROTECTING EARTH IS PROTECTING OURSELVES

A vibrant Earth Day celebration came alive in Grade II as students embarked on an immersive art project designed to deepen their connection with our planet. The young environmentalists channeled their creativity into crafting personalized Earth-themed accessories and artwork. Each student carefully illustrated our blue planet, bringing out its oceans and continents with vibrant colours and thoughtful details. They then designed eye-catching sashes adorned with powerful environmental messages that ranged from "Save Earth" to "Go Green," each slogan reflecting their personal commitment to environmental stewardship.

Beyond the artistic elements, this multi-faceted activity catalyzed the development of crucial life skills. Students strengthened their public speaking abilities as they presented their ideas to peers, while the collaborative nature of the project enhanced their teamwork capabilities. The pride gleaming in their eyes as they displayed their work reflected a deeper understanding of their role as Earth's future guardians.

A JOYOUS CHRISTMAS CELEBRATION

Joy echoed through the halls as Grade I and II students transformed their school into a magical Christmas wonderland. The air sparkled with anticipation as children, teachers, and staff gathered for a celebration that would kindle the true spirit of the season.

The morning unfolded with an enchanting nativity play, where senior students breathed life into the timeless story of Christmas. Their performance, both touching and sincere, captured the essence of hope and divine love that marks this special season.

The highlight came with jingling bells announcing Santa's arrival. Children gasped and squealed as the jolly figure in red appeared, his hearty "Ho, ho, ho!" filling the room with magic. Eyes widened and smiles bloomed as each child received their candies, creating moments that would glitter in their memories for years to come.

ANNUAL DAY CELEBRATION A Spectacular Celebration Of Talent And Achievement

The halls of our school came alive on December 21, 2024, as we hosted our magnificent Annual Day celebration, "Cultural Odyssey."

The cultural showcase began with our talented first and second-grade students transforming the stage into a vibrant tapestry of performances. Grade I students took the audience on an imaginative journey through themed segments including "Sky and Space," where young astronomers danced among the stars, "Jungle Safari," featuring playful wildlife choreography, and "Retro to Modern," which bridged traditional and contemporary dance forms. Grade II students brought "The Dholakpur Tales" to life through an innovative fusion of global dance styles, seamlessly blending Latin American rhythms, Afro Jazz movements, and Indian hip-hop beats.

Each performance demonstrated not just artistic talent, but also weeks of dedicated preparation by students and teachers alike.

As the curtains fell on this memorable celebration, it was clear that "Cultural Odyssey" had achieved something special – not just showcasing talent, but fostering a deep sense of unity and pride within our school community. The event set a new benchmark for excellence, proving that even our youngest students can create magic when given the right platform and guidance.

Exploring the Wonders of Air

Our Grade-I scientists dove into the invisible world of air through a captivating series of discoveries. Guided by their natural curiosity, they uncovered the mysterious properties of this essential element that surrounds us yet remains unseen to the naked eye.

The classroom transformed into a dynamic laboratory as students conducted hands-on investigations. They witnessed the power of air by launching self-made paper airplanes, creating colourful pinwheels that danced in the breeze, and observing bubbles that demonstrated air's ability to take shape. The young researchers were particularly mesmerized when they discovered how air pressure could crush a plastic bottle or lift a heavy book. Working in small groups, students documented their findings in their science journals, drawing conclusions and making predictions. Through this immersive exploration, these budding scientists not only grasped fundamental scientific principles but also developed critical thinking skills and the confidence to question, explore, and understand the world around them.
