

Fire Drill Activity

"Safety First, Always and Everywhere!"

Our Pre-Primary children participated in a fire drill activity designed to introduce them to basic fire safety in a fun, engaging, and practical way. They watched a demonstration on how fires can start, how a small fire can be handled safely, and what to do during an emergency.

The children demonstrated staying calm, following their teachers' instructions, walking in an orderly line, using the designated safe exit, and reaching the assembly point safely. The activity helped them understand the importance of fire safety, emergency evacuation, and being alert and responsible during emergencies.

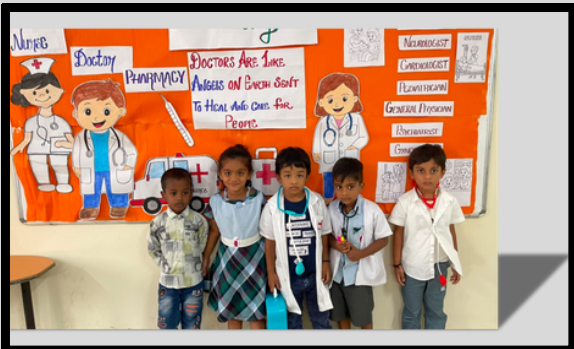

It was a meaningful, enjoyable, and valuable learning experience, helping our little ones develop essential safety awareness and confidence.

National Doctor's Day

Little Hands, Big Gratitude! Happy Doctors' Day!

Little ones celebrated National Doctors' Day with great enthusiasm. They came dressed as doctors and nurses, looking confident and caring. The children participated in a fun role-play activity where they treated their friends as patients using toy medical kits. Through this activity, they learned about the important role doctors and nurses play in keeping us healthy and safe. They also understood the values of kindness, care, and helping others. The celebration encouraged respect and gratitude for healthcare workers. Our school conducted health checkup doctors examine the children and gave health tips.

Number Hopscotch & Balancing Beam Activity

"Little hops, steady steps, and big achievements!"

Hop, balance, and have fun! Our little learners had an exciting time participating in the Number Hopscotch and Balancing Beam activities. Children happily hopped on numbered squares while counting aloud and carefully walked across the balancing beam, building confidence with every step. These engaging activities helped develop number recognition, balance, coordination, concentration, and gross motor skills through active play. Smiles, laughter, and learning filled the day as every child enjoyed the challenge!

Toy-Based Learning – Animal Puppet Making

“Little hands create, little minds learn, and every puppet tells a story!”

Our little learners enthusiastically participated in a Toy-Based Learning – Animal Puppet Making activity. With great excitement and creativity, the children made colourful snail puppets, exploring different features while expressing their imagination.

This engaging hands-on activity helped develop their fine motor skills, hand-eye coordination, creativity, imagination, and communication skills. It was a joyful and meaningful learning experience that brought learning to life through play.

Sensory Skills - Hearing & Smelling

Listen, Smell & Discover!

Our learners embarked on an exciting sensory adventure, exploring the wonderful world of hearing and smelling. Through thoughtfully planned activities, teachers encouraged children to listen attentively, identify familiar sounds and scents, and express their observations with confidence. Their enthusiasm, curiosity, and active participation made the session lively and enjoyable, fostering sensory awareness, critical thinking, observation, and communication skills in a fun-filled learning environment.

“Healthy children are happy learners!”

The school organised a Health Check-Up for the Pre-Primary students as part of our commitment to their health and well-being. The check-up was conducted at the school premises by medical professionals, with basic health parameters being assessed.

The initiative aimed to promote early identification of health concerns and encourage healthy habits among our young learners. It was a meaningful step towards ensuring the overall well-being of our children.

Brown Day Fun with Monkey Magic

Our learners celebrated Brown Day with great joy and enthusiasm. The celebration began with engaging discussions about brown-colored objects, followed by a monkey outline coloring activity in their scrap file books, where children creatively used brown shades to bring their artwork to life. Teachers encouraged active participation and creativity, making the learning experience interactive and enjoyable while strengthening color recognition and fine motor skills. A thoughtfully designed handout was also given to reinforce the concept at home, making the celebration both meaningful and memorable.
